

MAGIC OF CLEAN COMMUNITIES

Subject: Interdisciplinary

Grade Levels: K-5

Teacher's Guide

Overview

The Journey of a piece of refuse is tracked along 3 common paths as the students learn which is most effective in preserving our environment as they discover that they can make a difference every day.

Main Topic

Anti-Litter, Recycling for a cleaner environment

Subtopics

Personal responsibility respect character

Learning Goal

Students make a difference in their school, home, and community.

Vision and Reality

Students can effectively encourage their family to comply with recycling laws and standards.

Directory of Resources

If you have any specific questions after the assembly about recycling in your school & community, just touch base with me at: Bill@BillKerwood.com. I'm thrilled to respond with the answers you need to equip your community to make a difference!

Reduce - Reuse - Recycle

WWW.BILLKERWOOD.COM

Today's assembly program has been strategically designed over the past 18 years for maximum retention while the students and teachers have a blast!

BEST RESULTS FOR LEARNING

When lining your students up to go to assembly location, please line them up alternating genders: Boy, Girl, Boy, Girl, etc. (as much as feasibly possible). Students are seated on the floor with a 4-foot isle down the middle, segmenting the group into two equal sides.

Don't worry!

Chairs will be provided for teachers.
